

The World Leader in
Active Data Replication™

WANDISCO FUSION® AMAZON S3

Seamless cloud migration and hybrid cloud

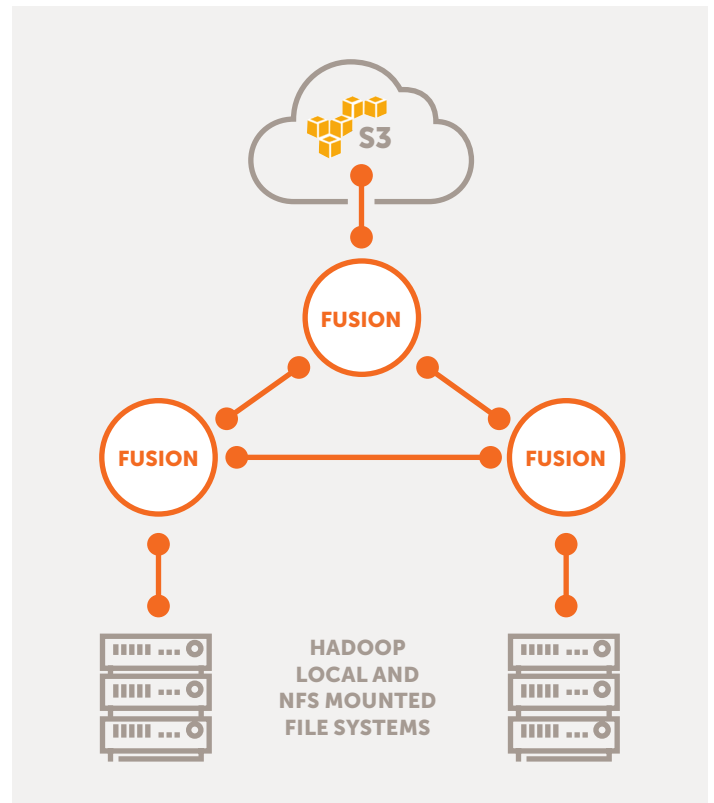

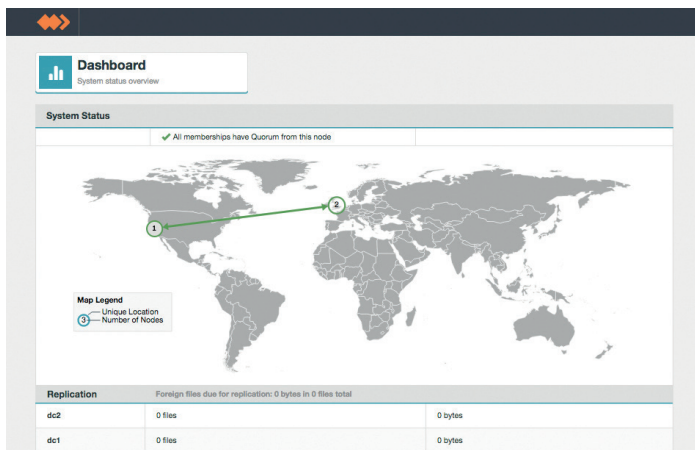

WANdisco Fusion is the only solution that seamlessly moves transactional data to Amazon S3 as it changes in on-premises local and NFS mounted file systems, Hadoop clusters and other cloud environments. WANdisco Fusion's patented Active Data Replication™ captures every change and supports hybrid cloud use cases for on-demand burst-out processing, data archiving and offsite disaster recovery (DR) with no downtime and no data loss.

No migration downtime

S3 and on-premises environments operate in parallel during migration, allowing data, applications and users to move in phases without disrupting normal operations.

Guaranteed data consistency

Amazon S3, on-premises storage and other cloud environments stay continuously in sync with LAN-speed read/write access to the same data at every location.

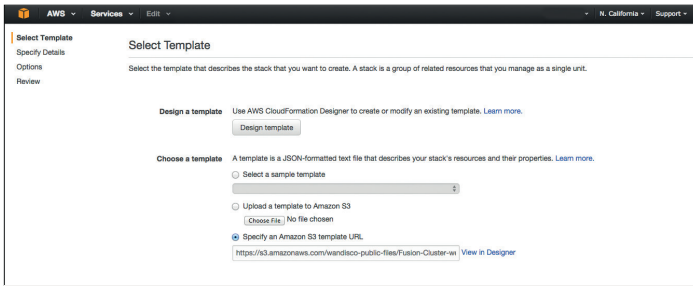

Automatic recovery

Recovery is automatic after planned or unplanned network or hardware outages in both on-premises and S3 environments.

Easy and intuitive

Simple setup in both on-premises and S3 environments using AWS Marketplace Cloud Formation Templates gets the software up and running in minutes. Its intuitive admin console for monitoring, scheduling and audit further simplifies the process.

FREE 14 DAY TRIAL

Experience the benefits of Fusion's Amazon S3 Migrator before you buy with a free 14-day trial. Visit the AWS Marketplace <http://amzn.to/1OqxU6I>

Supported environments

Hadoop

- HDP 2.2x - 2.4x
- CDH 5.3 - 5.7
- IBM BI 4
- Amazon EMR

Operating Systems

- RHEL 6.1+ (x86-64)
- CentOS 6.1 (x86-64)
- Ubuntu 12.04, 14.04
- SLES 11+ (x86-64)

Cloud

- Amazon S3
- Google Cloud
- MS Azure WASB
- OpenStack Swift

File System

- Local and NFS mounted file systems running under any of the operating systems listed above

About WANdisco

WANdisco (LSE: WAND) is the world leader in Active Data Replication™. Its patented technology provides continuous consistent access to changing data anytime and anywhere with no downtime and no disruption. WANdisco's patented technology serves crucial high availability (HA) requirements, including cloud migration, Hadoop Big Data and Application Lifecycle Management (ALM), including Subversion, Git and Gerrit. WANdisco works directly with Fortune 1000 companies around the world and in all sectors to ensure their data, whether it is on-premises or in the cloud, gives them the real insight they need. WANdisco is committed to the ODPI Interoperable Compliance Program to ensure its products are interoperable across a wider range of commercial Hadoop® platforms.

About Amazon Web Services

Amazon Web Services is a collection of cloud services that make up a cloud-computing platform offered by Amazon.com. The offered cloud computing services provide a simple way to access servers, databases, storage and a wide set of application services over the internet without a significant upfront investment in hardware. Amazon Web Services owns and maintains the network-connected hardware required for these application services, while you supply and use what you need via a web application.
