

The **LiveData** Platform

WANDISCO FUSION® ORACLE CLOUD OBJECT STORAGE

Oracle Object Storage with WANDisco Fusion

WANDisco Fusion is the only solution that seamlessly moves active data to Oracle Cloud Object Storage. WANDisco Fusion is an unparalleled replication technology that gives you LiveData — consistent data everywhere, spanning platforms and locations, even for changing data at petabyte scale.

Seamless cloud migration

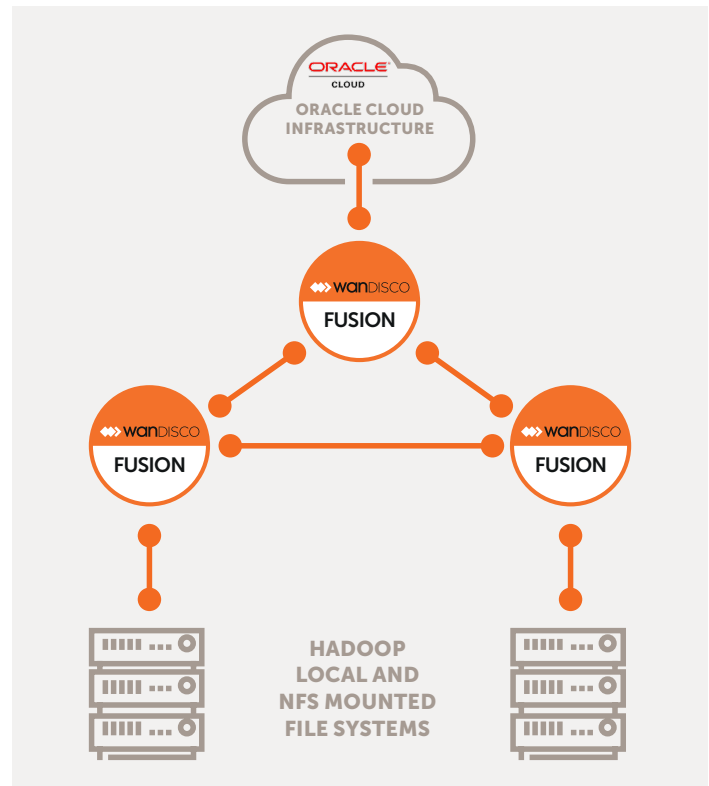

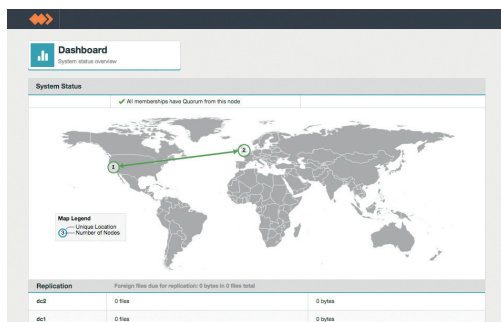

Use WANDisco Fusion to build your Cloud Data Lake. Coordinate all your data, combining on-premises data in local and NFS mounted file systems, Hadoop clusters and other cloud environments. Our game-changing, patented technology captures every change and supports hybrid cloud use cases for on-demand burst-out processing, data archiving and offsite disaster recovery with no downtime and without risk of data loss.

LiveData advantage

WANDisco Fusion coordinates data across Cloud Object Store platforms going well beyond any common copy utility or backup tool. It provides true multi-site data coordination for near real-time continuous replication.

Petabyte-scale Data Movement & Data Lake Migration

Migrate large-scale data to the cloud with no downtime or data loss. WANDisco Fusion guarantees data consistency across multi-region or multi-cloud environments. Connect any version of object storage to the native Oracle Cloud Infrastructure and unify your data lake. Cloud and on-premises environments operate in parallel during operation, allowing business continuity.

Accommodate changes with flexible architecture

Enable multi-vendor strategies — and take control of your data gravity. Oracle Cloud, on-premises storage and other cloud environments stay continuously in sync with read/write access to the same data at every location.

Automatic recovery

Resumption of service and data coordination is automatic after planned or unplanned network or hardware outages in both on-premises and cloud environments. Any discrepancy is automatically resolved. It's self-healing.

Easy and intuitive

Simple setup in both on-premises and cloud environments using the Installation Guide Templates gets the software up and running in minutes. Its intuitive admin console for monitoring, scheduling and audit further simplifies the process.

Supported environments

Hadoop

- Oracle® BDA and BDCS
- Oracle Big Data Cloud
- Hortonworks (HDP)
- Cloudera CDH
- MapR
- IBM BigInsights®
- Amazon EMR
- Google Cloud Dataproc
- Microsoft Azure HDInsight®

Operating Systems

- Oracle Linux
- RHEL
- Centos
- Ubuntu
- SLES

Cloud

- Oracle® Cloud
- Amazon
- Google Cloud™
- Microsoft Azure®
- Alibaba Cloud

File

- Oracle Object Storage (OCI and Classic)
- OpenStack® Swift
- Amazon S3®
- Virtustream Storage Cloud
- IBM COS
- NetApp ONTAP
- Local and NFS mounted file systems

ABOUT WANDISCO

WANdisco is the LiveData company that empowers enterprises to revolutionize their IT infrastructure with its groundbreaking distributed coordination engine (DConE) in the WANdisco Fusion platform, enabling companies to generate hyperscale economics with the same IT budget – across multiple development environments, data centers, and cloud providers. WANdisco Fusion powers hundreds of the Global 2000, including Cisco Systems, Allianz, AMD, Juniper, Morgan Stanley and more. With significant OEM relationships with IBM and Dell EMC and go-to-market partnerships with Amazon Web Services, Cisco, Microsoft Azure, Google Cloud, Oracle, Alibaba and other industry titans – WANdisco is igniting a LiveData movement worldwide.
